

USER GUIDE

How to use your AI Trading Journal

Bank Nifty · Nifty 50 · Crypto · F&O · Google Sheets

// WHAT YOU WILL LEARN IN THIS GUIDE

- 01 How to set up your journal in 5 minutes
- 02 How to log a trade correctly (every column explained)
- 03 How to read your Dashboard and 12 KPIs
- 04 How to run the AI Coach Report
- 05 How to use the Weekly Review
- 06 How to use Chart Analysis with free AI

Takes 5 minutes to set up.

2 minutes per trade to log.

The data does the rest.

SECTION 1 — SETUP IN 5 MINUTES

STEP 01 Open the Google Sheet link from your email

You will receive a Google Sheet link after purchase.

Click it — it opens in your browser. You do not need to download anything.

STEP 02 Make a copy — this is critical

Click File (top menu) → Make a Copy

Give it a name like: My Trading Journal 2026

It saves to your personal Google Drive. The original stays untouched.

■ Do NOT type in the original shared link — always work in your copy.

STEP 03 Allow the AI Coach (Apps Script)

When you open your copy, you will see a menu: ■ AI COACH

If a security popup appears → click Advanced → Go to thetradingmindset26 (unsafe)

This is normal for Google Apps Script. The script only reads your trade data.

Click Allow. The AI COACH menu will now appear every time you open the sheet.

STEP 04 Delete the sample data

Go to TRADE_LOG sheet (tab at bottom)

The first 10 rows have sample trades for demonstration.

Select rows 4 to 13 → right click → Delete rows.

Now your journal is blank and ready for your real trades.

STEP 05 You are ready. Log your first trade.

Go to TRADE_LOG. Start from row 4.

All columns have dropdowns — use them. Do not free-type where dropdowns exist.

After logging 5 trades: click ■ AI COACH → Run Full Analysis.

SECTION 2 — EVERY COLUMN EXPLAINED

Fill every column for every trade. Incomplete rows reduce your AI report accuracy.

A	DATE The date you took the trade. Format: DD-MM-YYYY or use date picker.
B	INSTRUMENT What you traded. Dropdown: Bank Nifty, Nifty 50, Crypto, etc.
C	SETUP Your trade setup type. Dropdown: Opening Range, Reversal, Breakout, etc.
D	ENTRY TF Entry timeframe. Dropdown: 1m, 3m, 5m, 15m, etc.
E	HIGHER TF The higher timeframe you checked for structure. Same dropdown.
F	MARKET COND What the market was doing. Dropdown: Trending, Ranging, Volatile, etc.
G	ENTRY PRICE The price at which you entered the trade.
H	EXIT PRICE The price at which you exited.
I	PNL (PTS) Your profit or loss in points. Positive for profit, negative for loss.
J	R:R Your actual Risk:Reward achieved. E.g. 1.5 means you made 1.5x your risk.
K	FOLLOWED RULES Dropdown: Yes or No. Did you follow ALL your pre-trade rules?
L	EMOTION BEFORE How you felt BEFORE entering. Dropdown: Calm, FOMO, Fearful, etc.
M	EMOTION AFTER How you felt AFTER the trade closed. Dropdown: Satisfied, Regretful, etc.
N	MISTAKE Did you make a mistake? Dropdown: Moved Stop Loss, Revenge Trade, etc.
O	NOTES Optional. Anything specific you want to remember about this trade.
P	QUALITY SCORE Auto-calculated. Do not type here. Rates trade quality 1–10.
Q	DECISION SCORE Auto-calculated. Do not type here. Rates your decision quality 1–10.

SECTION 3 — RUNNING THE AI COACH REPORT

The most powerful feature. Generates an 8-section coaching report from your actual trade data.

// HOW TO RUN

- ① Log at least 5 trades in TRADE_LOG
- ② Click  AI COACH in the top menu bar
- ③ Click  Run Full Analysis
- ④ Wait 10–15 seconds. All 8 sections fill automatically.
- ⑤ Go to COACH_REPORT tab to read your report.

// THE 8 SECTIONS — WHAT EACH ONE MEANS

01 PERFORMANCE REALITY

Your actual win rate, Profit Factor, expectancy in plain numbers. No sugar-coating.

02 KILLER MISTAKE

The single habit that is bleeding your account. Usually one of: moved stop, revenge trade, FOMO.

03 BEST SETUP

Your highest Expected Value setup ranked by real trade data. Trade this more. Skip the rest.

04 WORST HABIT

The behavioural pattern appearing most in your losing trades.

05 PSYCHOLOGY

Your dominant emotion before and after trades. Finds your emotional loop.

06 MARKET CONDITION

Which market condition you win in vs lose in. Stop trading the wrong conditions.

07 ACTION PLAN

4 specific things to do in your NEXT session. Generated from your own data.

08 OVERALL GRADE

A / B / C / D / F — based on win rate, Profit Factor, and discipline %.

SECTION 4 — READING YOUR DASHBOARD

12 KPIs auto-calculate from your trade log. Never type in this sheet.

TOTAL TRADES

How many trades you have logged. Need 20+ for reliable data.

WIN RATE

Percentage of trades that closed in profit. Target: above 55%.

TOTAL PNL

Cumulative profit/loss across all trades logged.

PROFIT FACTOR

Sum of wins ÷ sum of losses. Above 1.5 = strong edge. Below 1.0 = losing system.

AVG R:R

Average Risk:Reward ratio achieved. Target: above 1.5.

DISCIPLINE %

Percentage of trades where you followed ALL your rules. Target: above 80%.

AVG WIN

Average profit on winning trades in points.

AVG LOSS

Average loss on losing trades in points. Should be less than avg win.

EXPECTANCY

Average points made per trade across wins and losses. Positive = edge exists.

QUALITY SCORE

Average trade quality rating 1–10. Auto-calculated per trade.

DECISION SCORE

Average decision quality 1–10. Rates your process, not just the outcome.

OVERALL GRADE

A/B/C/D/F calculated from win rate, profit factor, and discipline combined.

SECTION 5 — WEEKLY REVIEW

Use this every Friday or at the end of your trading week.

STEP 1

Go to the WEEKLY_REVIEW sheet (tab at bottom)

STEP 2

In cell B4 — type your week-end date. Format: 2026-04-25

STEP 3

Click  AI COACH → Run Weekly Review

STEP 4

All 7 sections fill automatically in 10 seconds

STEP 5

Read the report. Act on one thing next week.

SECTION 6 — CHART ANALYSIS

Store your charts alongside AI price action notes. Uses any free AI — ChatGPT, Gemini, or Claude.

01 Go to CHART_ANALYSIS sheet

Tab at the bottom of your journal. Each row = one chart review.

02 Fill columns A to F

Date, Instrument, Entry TF, Higher TF, Emotion, What I Saw. Use dropdowns.

03 Insert your chart screenshot in column G

Insert → Image → Insert image in cell. Paste your TradingView or broker screenshot.

04 Click on your row, then click ■ AI COACH → Chart PA Prompt

A popup appears with a ready-made price action prompt.

05 Copy the prompt. Open ChatGPT / Gemini / Claude (free)

Paste the prompt. Attach your chart image. Click submit.

06 Copy the AI output. Paste into column H (PA Notes)

The result stores alongside your chart permanently in your journal.

■ IMPORTANT NOTE ON PASTING AI OUTPUT

When pasting ChatGPT output into column H, double-click the cell first to enter edit mode, THEN paste. This keeps all text in one cell and prevents row expansion.

COMMON QUESTIONS

Q: Do I need any coding or technical skills?

A: No. If you can open a spreadsheet and use dropdowns, you can use this journal.

Q: Does it work on my phone?

A: Yes. Google Sheets works on Android and iPhone. All features work on mobile.

Q: What if I trade multiple instruments?

A: Just log them all in the same TRADE_LOG. The AI separates and analyses each one.

Q: Can I add my own setup types that aren't in the dropdown?

A: The dropdowns cover 12 major setup types. If yours is different, select "Other" and note it in the Notes column.

Q: The AI COACH menu is not showing. What do I do?

A: Reload the page. If still missing: Extensions → Apps Script → Run "onOpen". Then reload.

Q: My dates are not being found in Weekly Review.

A: Make sure dates in TRADE_LOG column A match the format used in Weekly Review B4. Use YYYY-MM-DD format.

Q: Can I share my journal with someone else?

A: You can share your copy for viewing. Do not share editing access — others could change your data.

Q: Something looks broken. Who do I contact?

A: DM @thetradingmindset26 on Instagram. Response within 24 hours.

Ready to upgrade to the AI Pro Edition?

The Pro version adds a full 8-section AI coaching report, Weekly Review, Setup Analysis, Psychology Log and Chart Analysis.
